PROFESSIONAL SUMMARY

Data analytics fresher with strong hands-on experience in SQL, Excel and Power BI, focused on workflow optimization, cost analysis, and decision-driven dashboards. Built analytics solutions that quantified delay-driven cost overruns and enabled data-backed resource reallocation decisions with up to 20% potential cost reduction. Seeking an entry-level data analyst role in IT services or consulting-driven environments.

PROJECTS

Workflow Delay & Resource Optimization Analysis | SQL, Power BI

- Analyzed workflow delays and resource allocation data to identify project cost overruns and productivity loss.
- Designed a SQL-driven data model to calculate delay impact cost, resource utilization, idle cost, and skill mismatch.
- Built a decision-focused Power BI dashboard with executive summary, delay analysis, and resource optimization views.
- Simulated resource reallocation scenarios showing ~20% potential reduction in delay-related costs.

Sales Analysis Dashboard | Excel, Power BI

- Built an interactive Power BI dashboard to analyze sales performance by region, category, and time.
- Used Power Query for data cleaning and transformation.
- Created DAX measures for total sales, profit, and growth trends.

Data Analysis using Excel

- Analyzed structured datasets using Pivot Tables and Excel formulas.
- Identified trends and insights to support basic business decision-making.

SKILLS

Technical Skills

- SQL (Joins, Aggregations, Analytical Queries)
- Power BI (Data Modeling, DAX, Dashboards)
- Microsoft Excel (Pivot Tables, Lookups, Data Cleaning)
- Python (Basic data analysis)

Analytical Skills

- Business Problem Framing
- KPI Definition
- Cost & Productivity Analysis
- Data-Driven Decision Support

EDUCATION

Bachelor of Computer Application (BCA)
2023 – 2026
